Hydraulic Toe Jacks

For machinery lifting and positioning with minimum available access.

Lifting points on toe and head offers much wider applications than a conventional hydraulic jack.

Characteristics:

- Quick, simple and effortless operation by hand.
- Lifting points on toe and head provides added versatility.
- The toe structural part is made of alloy steel and casted from a mold without welding or bending process, which materializes great strength and durability.
- Low height lifting toe allows working in confined areas.
- High strength return spring enables rapid ram retraction.
- Swiveling pump handle assembly allows the operator to access and pump the unit from numerous positions.
- Built-in safety valve prevents overpressurization.
- Internal overflow valve functions as a stroke limiter.
- Convenient carry handle.
